01 | Overview

5G & AI Video Analytics based solution

02 | Teleco's

Your Time to unlock

03 | DeepSight Platform

Our Solution to Teleco's for faster AI deployment

04 | 5G AI Use Case

5G AI Ongoing Platform

05 | Customers

06 | Our Accolades

OverView 01

5G & AI Video Analytics - Power of
“TWO”

UNDERSTANDING THE PROBLEM

AI Deployments

Solution deployments are lengthy & need technical assistance

AI Accuracy

Generating accurate & timely alerts is complex

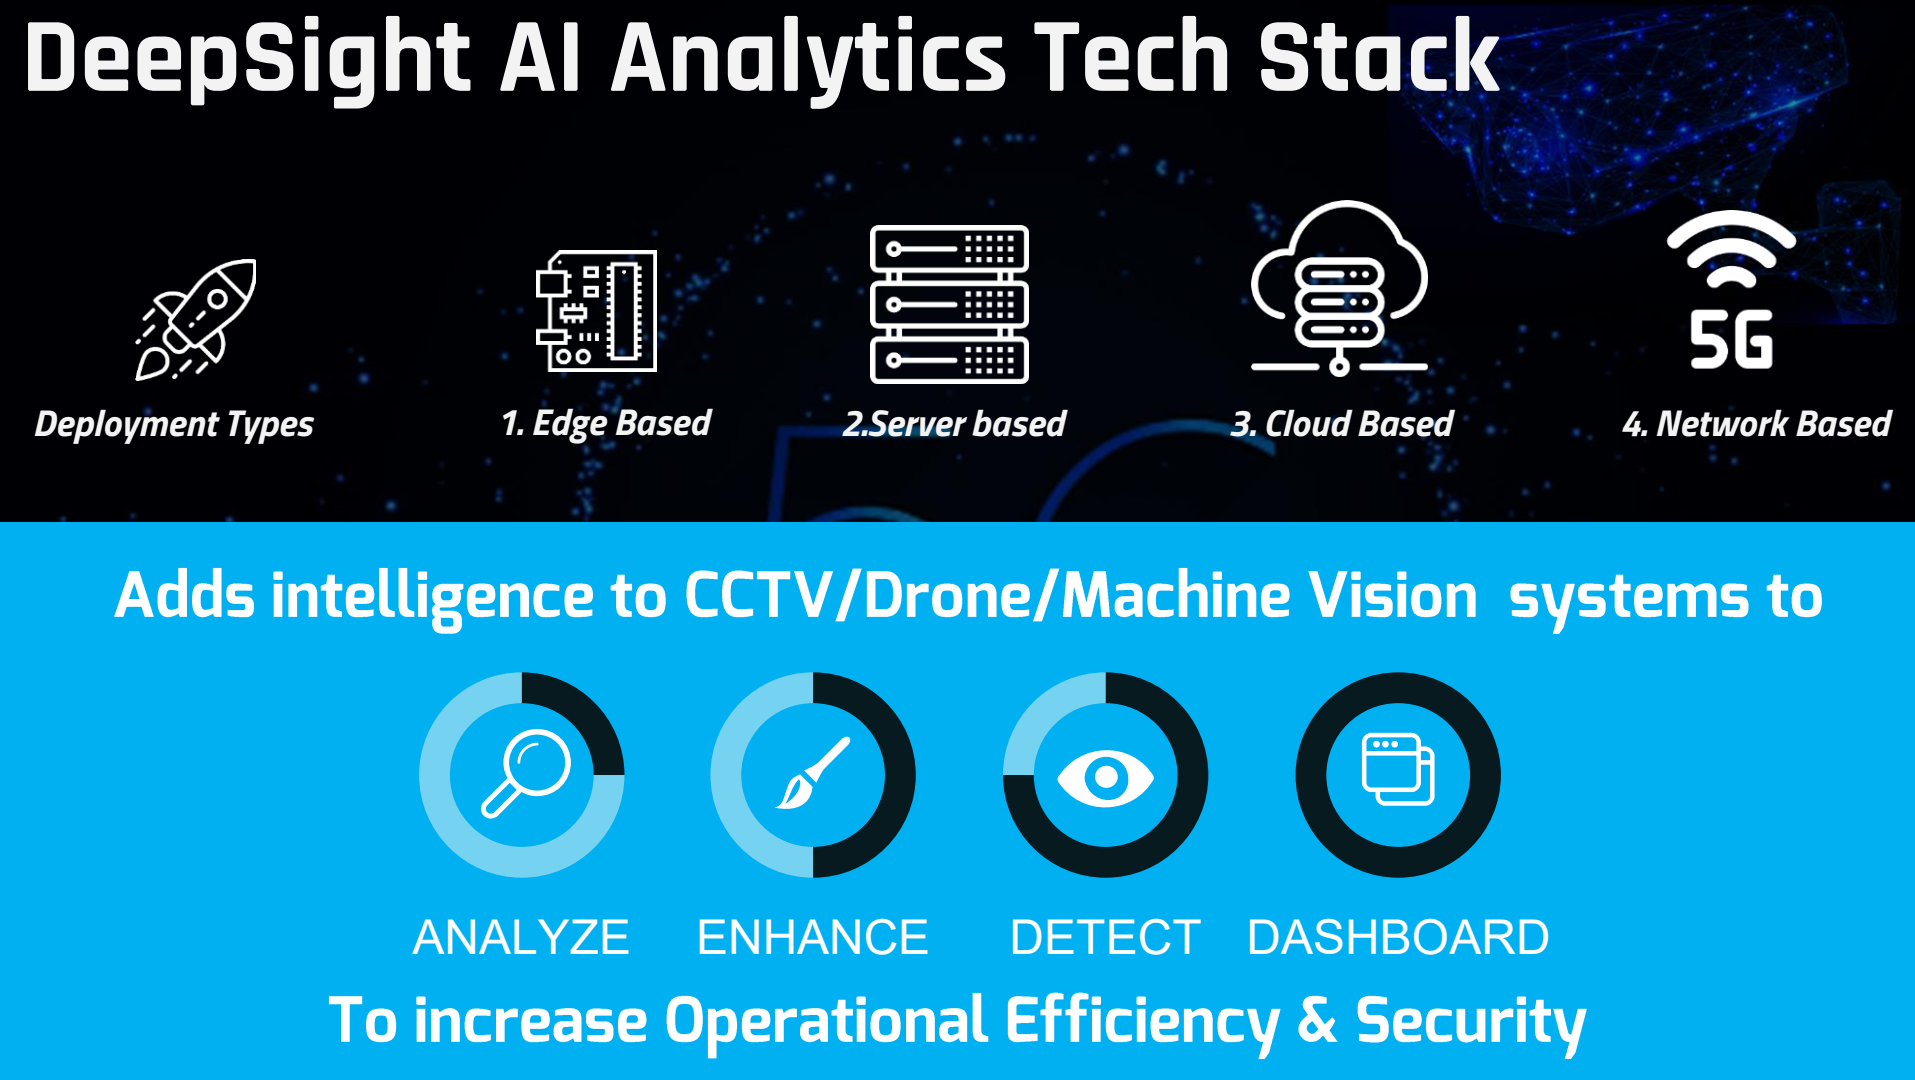

AI Fine Tuning

High intense projects need fine tuning on-field post deployment

AI companies are currently *experiencing continuous request* from clients with various types of deployment

DeepSight's AI platform is Scalable & Stable that can be deployed on Edge, Server, Cloud and 5G ready retrofit CCTV/Drone/Machine Vision real-time Computer Vision platform to deploy new object detection/action/incidents/QA etc. Recognition in faster ways with High accuracy.

ABOUT US

OUR USP

1

Feature Customization

Computer Vision Features

Scalable System
10's of Feature
Support

Retrofit Solution
(Any CCTV)

Dashboard
with Analytics

2

Quick Deployment

Automated 15 Imaging
Augmentation

IoT / HID Ready
Integration

Behavior & Object
Analytics Models

"1 Click"
Deployment &
Integration

3

Hyper Scaling

Handle 10 to 1000's
of CCTV Cameras

Supports Cloud, Server
and On-Premises

Platform on Low Config
CPU/GPU/FPGA to High

Multi-Access
Edge Computing

4

On-Field Tuning

Proprietary
"Neural Network"

High Accuracy

Platform reduces Ai
Training from 6
weeks to 2 weeks

Live Fine Tune on
Deployments

Telcos

Your Time to Unlock *"New Opportunity"*

02

5G & AI Video Analytics - Power of "TWO"

5G & AI Video Analytics – Benefits Telcos

New & Disruptive Business Model

- 1. 5G with AI Video Surveillance for Increased ARPU*
- 2. Video Analytics offerings with Subscription option*
- 3. Cross sell more services through AI to large customers*
- 4. Surveillance to Indoor Coverage with 5G Private Network*
- 5. Customized Video Analytics solution to Business Segments*
- 6. Video Streaming at 5G Devices*

Teleco's - Time to Reinvent the Business Models

5G with Video Analytics provides enormous business opportunity for telecom's

Industries

Sample Use Cases

1. Customer Analytics for the Business
2. Video Surveillance for Business
3. Crowd Analysis across the Branches
4. Productivity Solutions
5. Employees Workplace Safety
6. Many More

Business Model

SaaS

(Subscription Model is very suited model which is already in place for telcos)

Exponential power of the 4 Techs for Telco's Business Growth

5G x AI x Video Analytics x MEC
=
New Revenue Stream
(For Telcos)

Deepsight 5G AI Video Analytics Platform

03

Our platform enables Teleco's to do faster
AI deployment

5G- DeepSight AI Labs Role

Validation of 5G hardware for AI

- AI Video Accelerators Card
- Servers and Processors
- 5G Chip
- 5G Mobile
- 5G Routers
- 5G SIM based CCTV
- 5G Access & Core Network
- MEC Platform
- 5G Automation Devices
- Cloud Infrastructure

Pre- Deployment

intel

Video Analytic requirement

- QoS
- Latency
- Reliability
- Speed of detection

5G- DeepSight AI Labs Role

Indoor Coverage VA based Offerings on 5G

- Banks
- Ports
- Hospitals
- Warehouses
- Airports
- Transportation
- Smart City
- Constructions
- Factories
- Hospitality
-

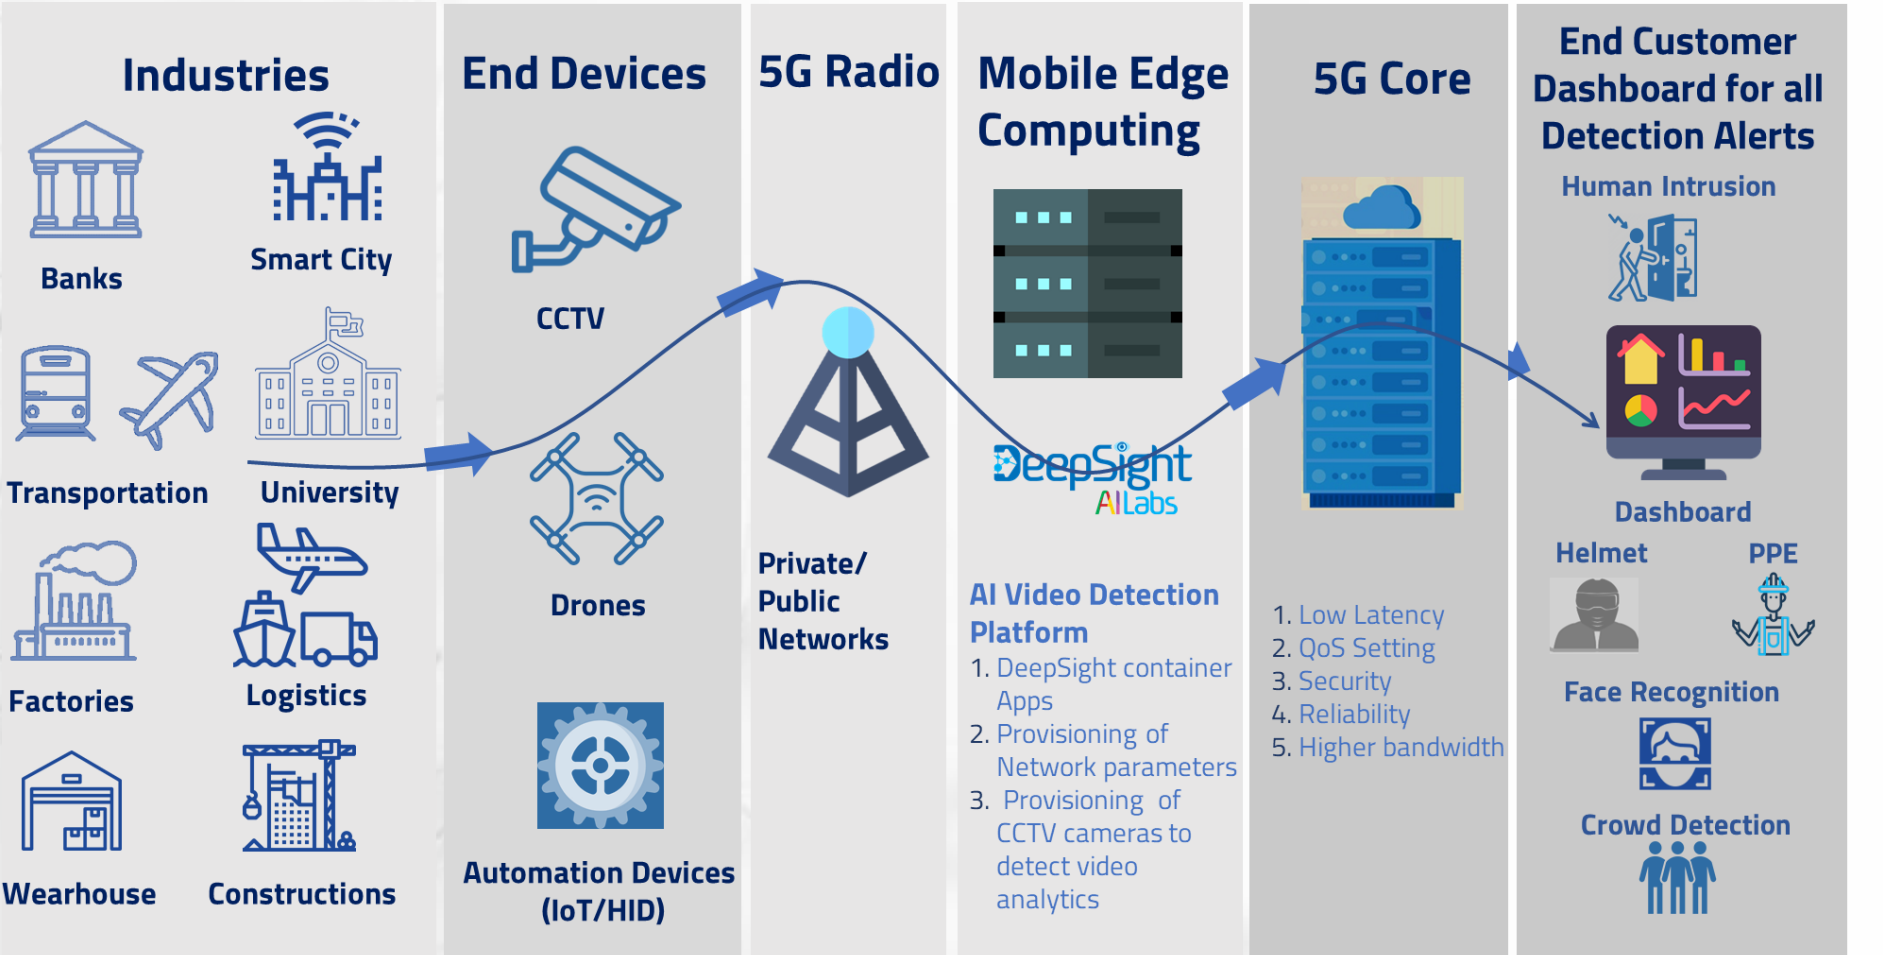

Post-Deployment

(5G + VA+ AI Offerings)

Private & Public Networks

- Use case based on Enterprise Video Analytics
- AI Video Analytics Deployments
- End to end AI video Analytics deployment

DeepSight Platform is “5G Ready”

5G AI Ongoing Use Case

04

5G & AI Video Analytics - Power of “TWO”

Technology companies teamed up to make this successful deployment in Spain through 5TONIC

Telefonica

5G network Provider

DeepSight[®]
AIlabs

AI Based Video Analytic Provider

Capgemini engineering

MEC Platform

ERICSSON

5G Core hardware

5G Consortium

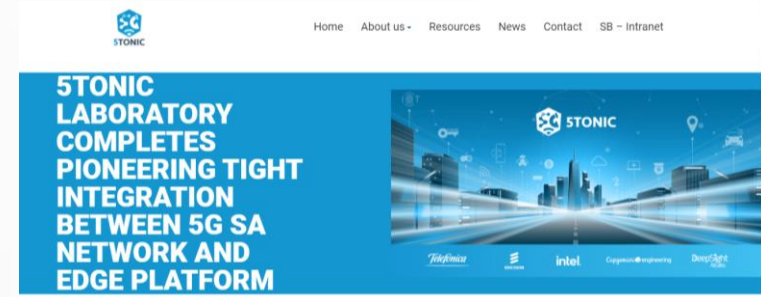

Intel[®]
Smart Edge
Open

Intel Smart Edge Open

Use Case

One of the first standalone 5G use case combining 3 key technologies

- **5G Network**
- **AI based Video Analytics**
- **MEC Deployment**

<https://www.5tonic.org/news-20210412-5tonic-laboratory-completes-pioneering-tight-integration-between-5g-sa-network-and-edge-platform/>

Location – Spain

Duration – 3 Months
(Dec '20 to Mar '21)

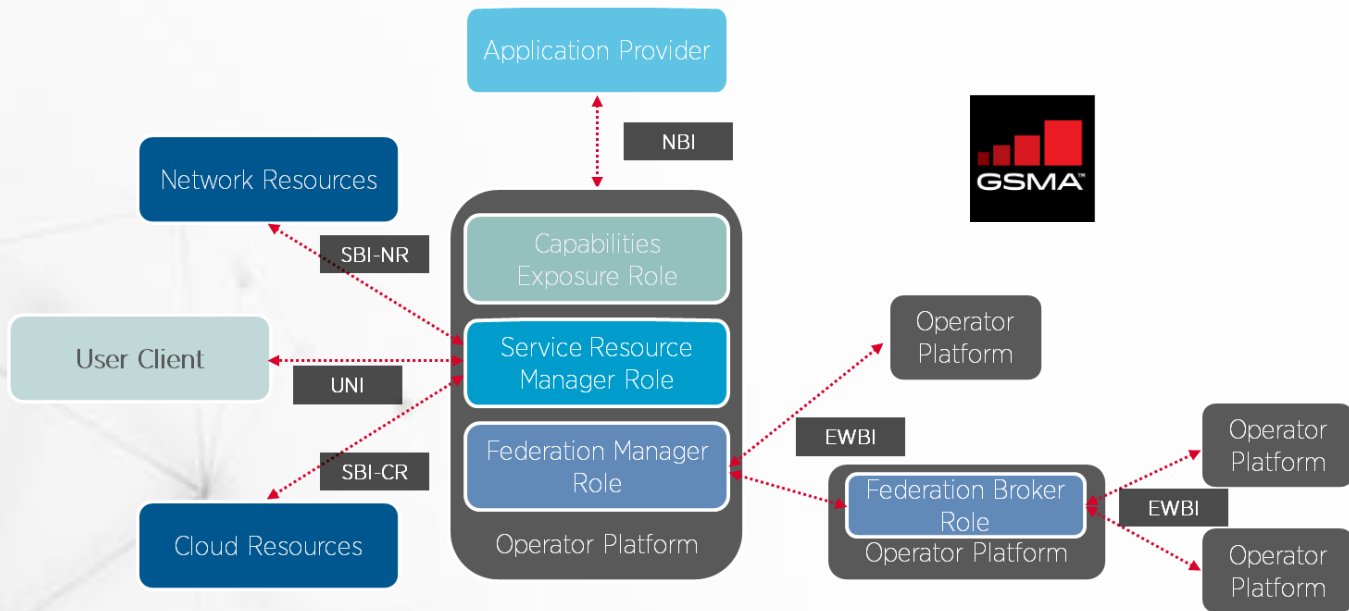

Lab – 5Tonic

Edge OPG architecture

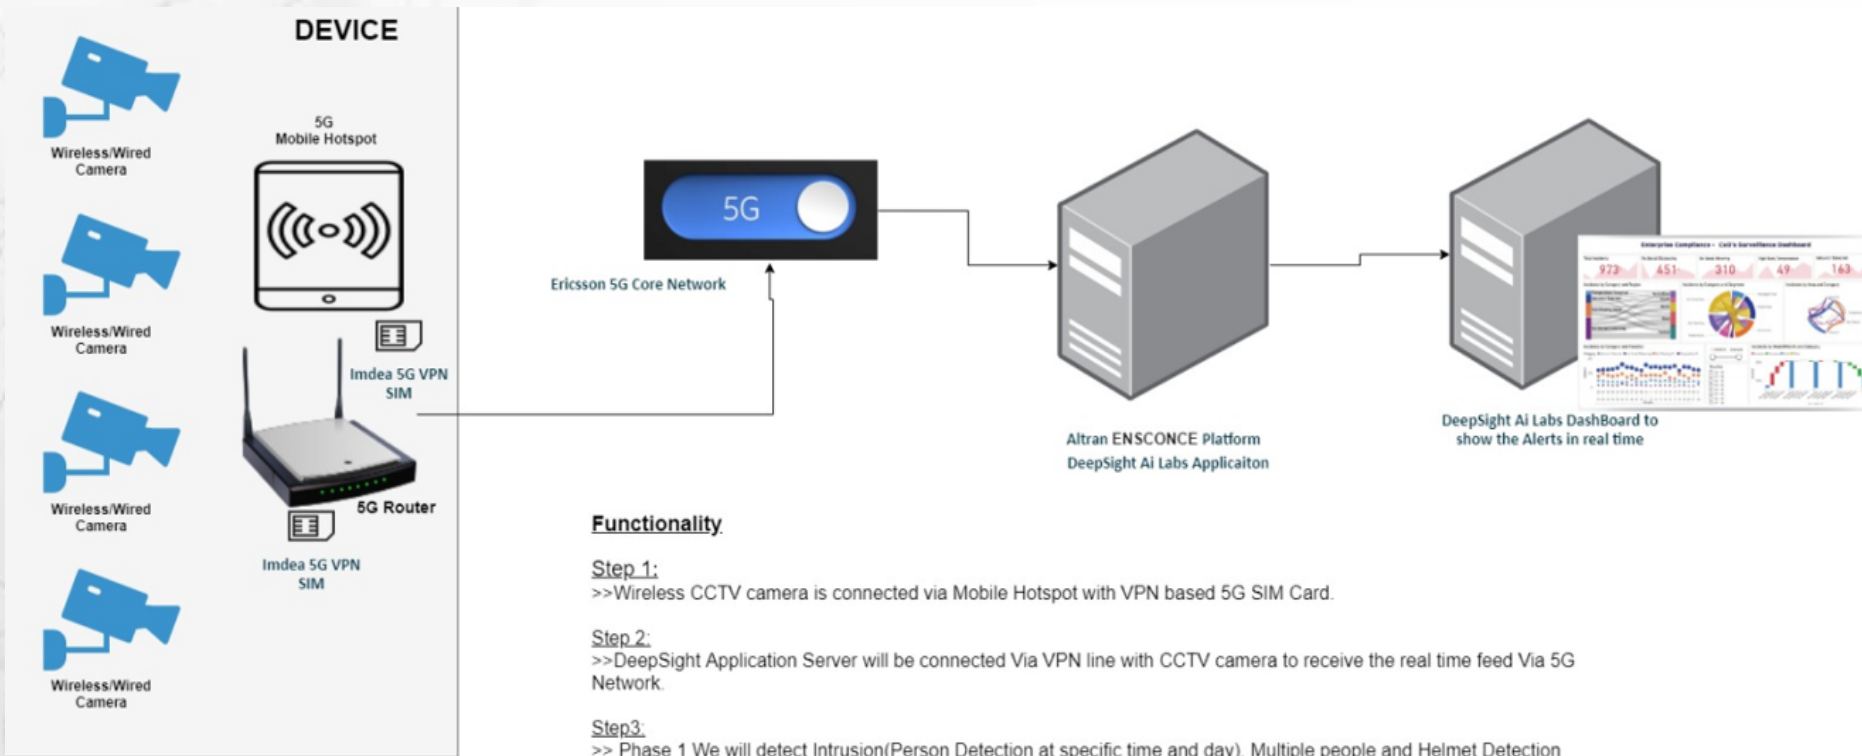

GSMA Operator Platform Group reference architecture, including the actors and interfaces of an end-to-end edge service delivery.

- **NBI** to allow developers to onboard and configure applications
- **SBI** to request resources, both for cloud and network
- **EWBI** to federate with other operators, enabling the roaming of applications and users.
- **UNI** to communicate with the devices.

5G and AI based Video Analytics deployment in Spain

5TONIC lab

Functionality

Step 1:

>> Wireless CCTV camera is connected via Mobile Hotspot with VPN based 5G SIM Card.

Step 2:

>> DeepSight Application Server will be connected Via VPN line with CCTV camera to receive the real time feed Via 5G Network.

Step 3:

>> Phase 1 We will detect Intrusion(Person Detection at specific time and day), Multiple people and Helmet Detection Feature.

Step 4:

>> As soon feature detected, Alerts are being sent to DashBoard Server via Internet.

5TONIC MEC SA Integration

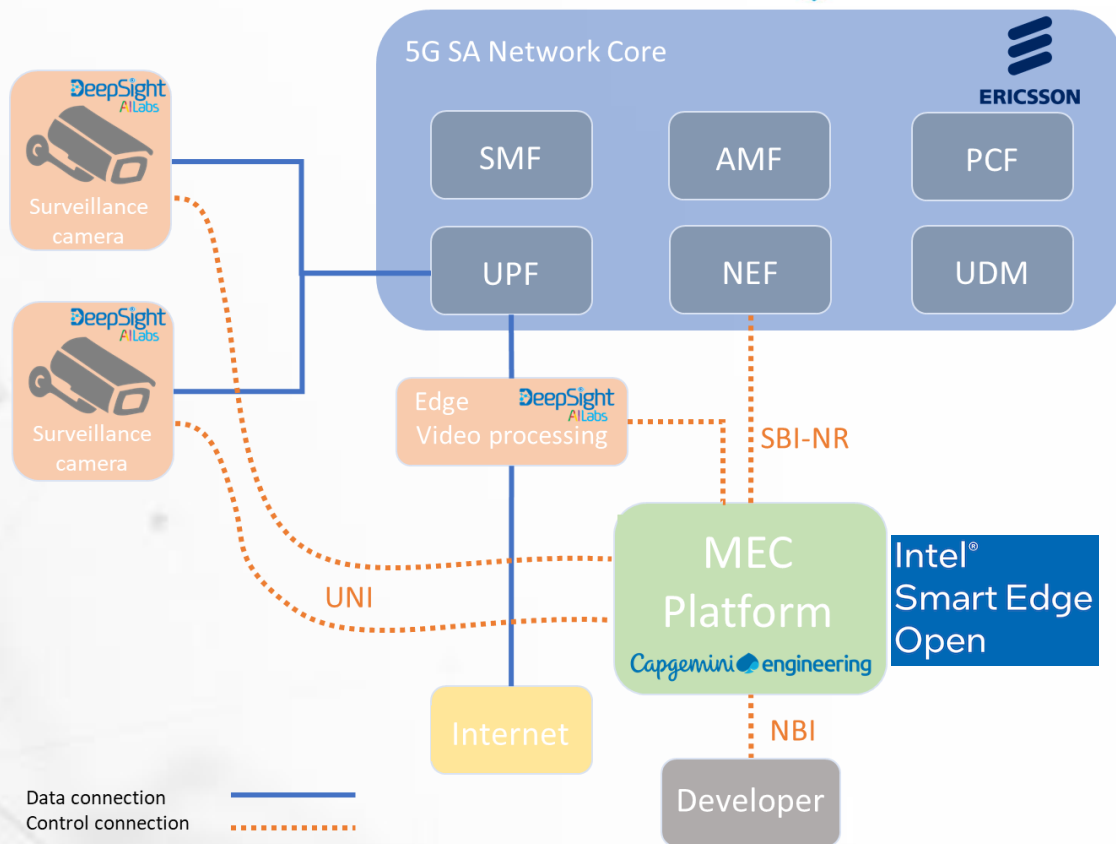

Application intelligence deployed on the network border, close to the UPF.

Direct access from the remote cameras, lowest latency possible to the application intelligence on edge servers.

Control connection from cameras to the MEC platform for discovering edge video processing server.

Control connection from MEC platform to 5G core (NEF) to request for capabilities:

- Device information, e.g. location
- Request for guaranteed quality of service.
- Request for modification on charging policies
- Optimize network routing of edge applications.

Results Outcome - 5 G Ready

DeepSight AI Video analytics onboarded on MEC to detect objects in real time & send alerts on the 5G network

<30 ms

Latency

400 mbps

High Speed

Real Time Alerts on 5G for
Human Intrusion

Alerts

Customers 05
