

Demystifying Enterprise Digitalization Powered by Intelligent Network

Kumkum Datta

Global Practice Head 5G4E, Tech Mahindra

Udayan Mukherjee

Chief Architect, Network and Edge Group, Intel

A DAY IN A MANUFACTURING ENTERPRISE

DIGITAL SUPPLY

Benefit: JIT Material Movement

DIGITAL OPERATION

Benefit: Reduced Wastages

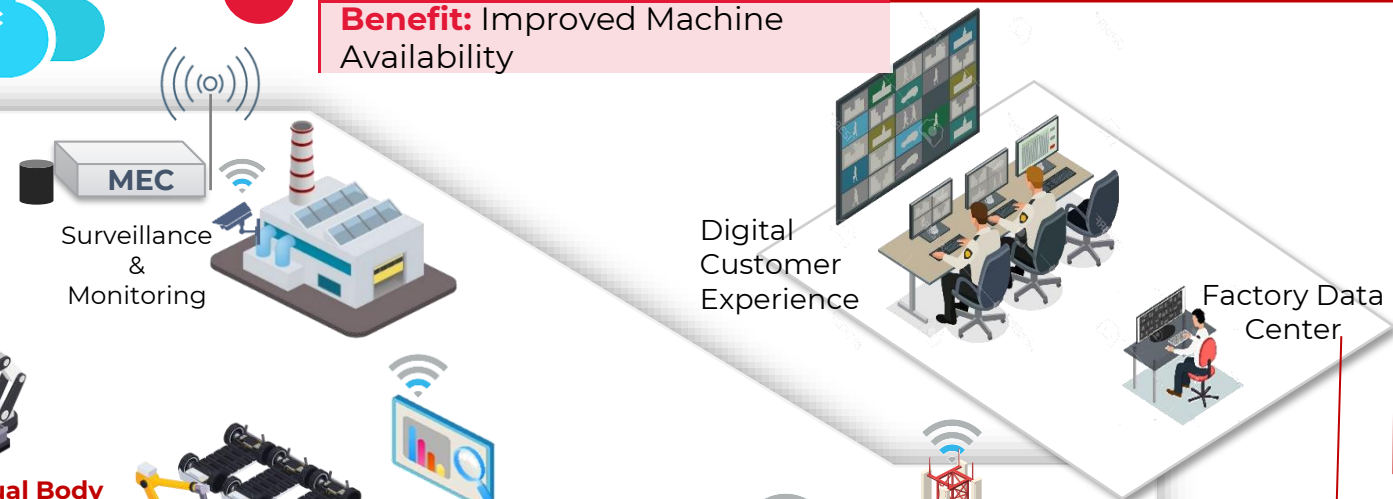

DIGITAL PRODUCTION

Benefit: Reduced Equipment Downtime

DIGITAL SERVICES

Benefit: Improved Machine Availability

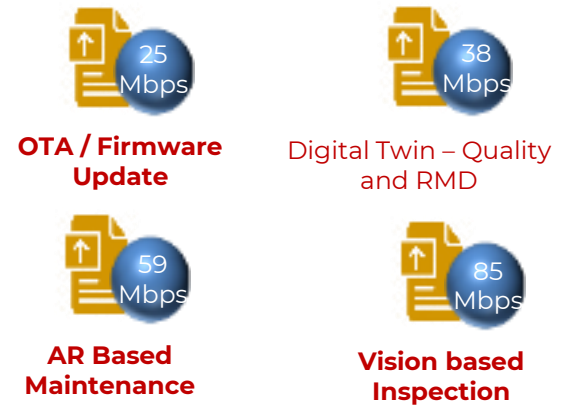

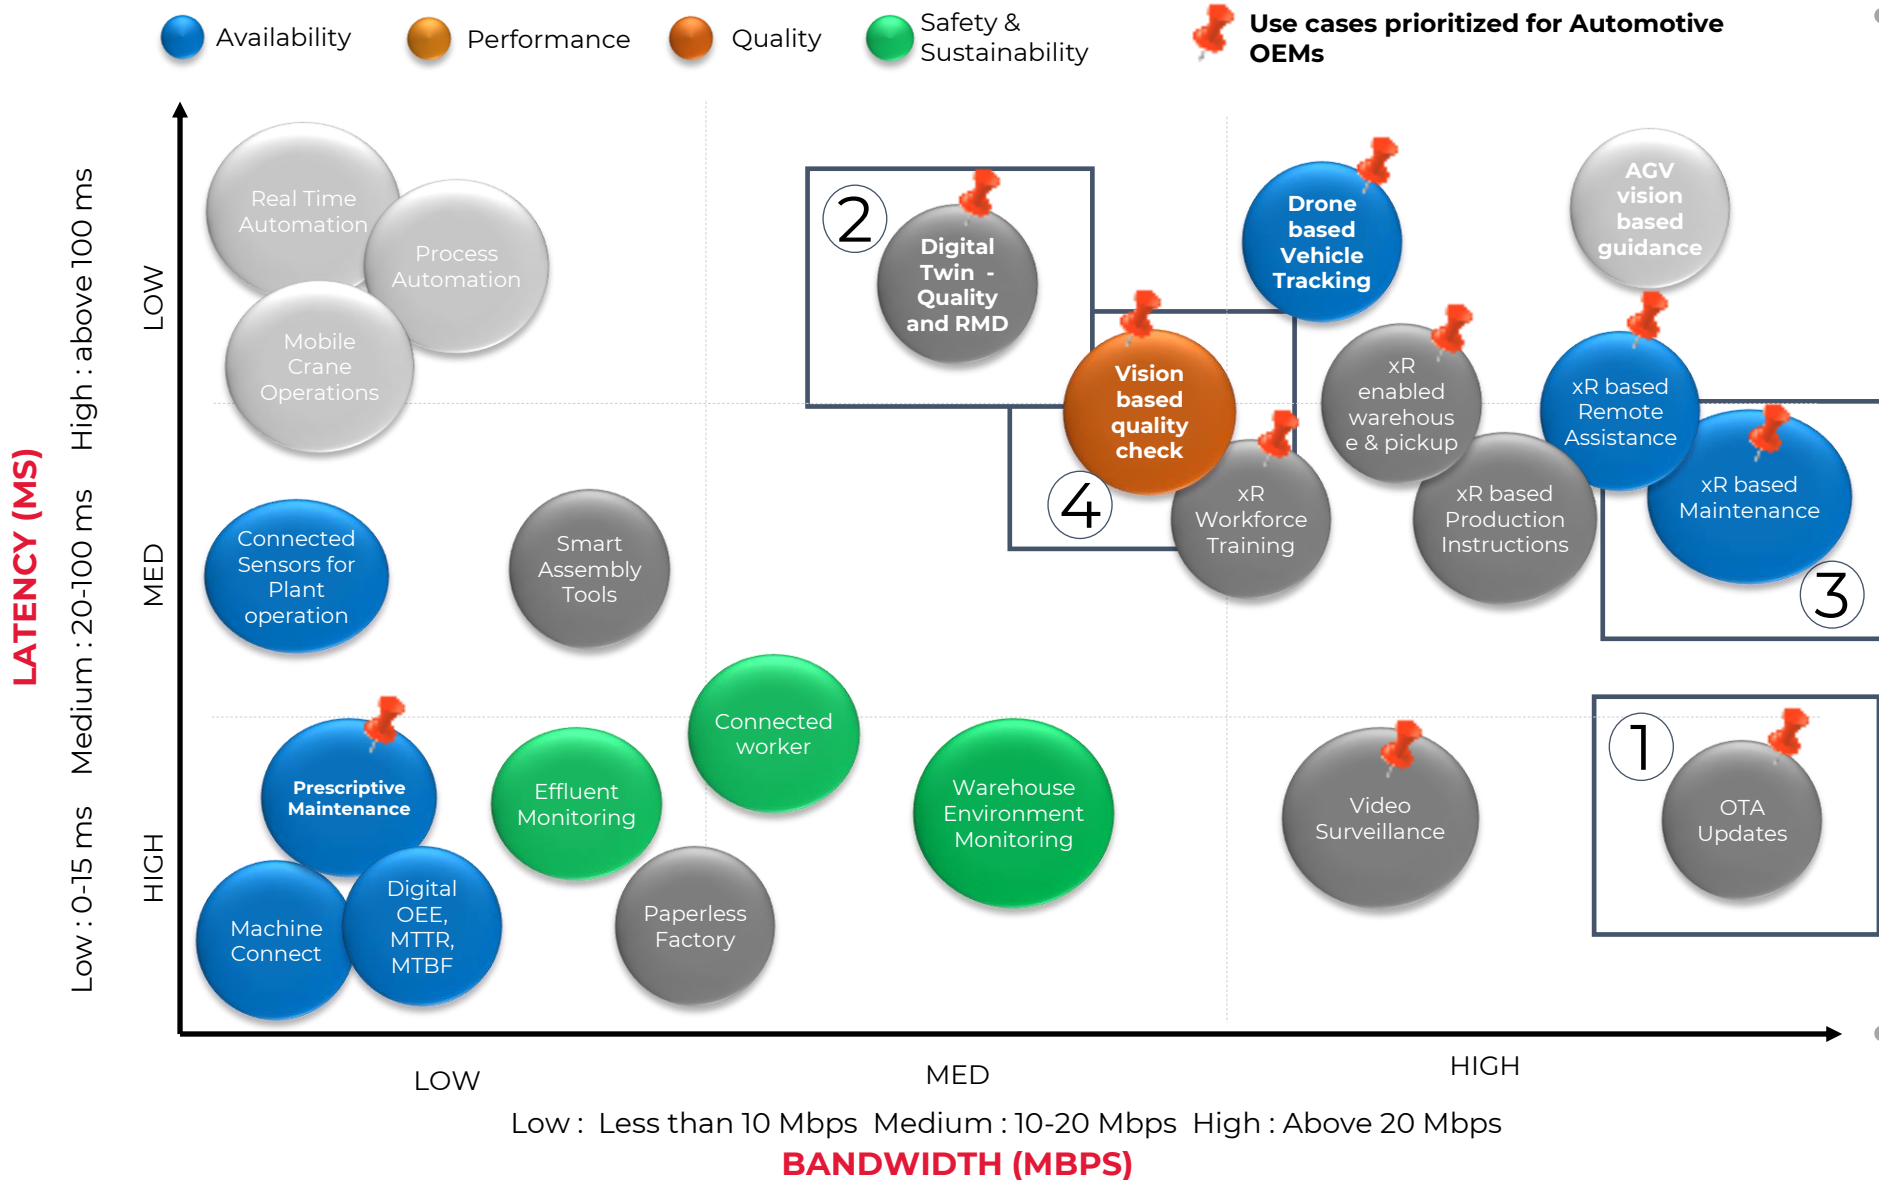

VEHICLE SW

Vehicle OTA

DIGITAL SOLUTIONS DRIVING NEED OF HIGH BANDWIDTH / LOW LATENCY

Variety, Velocity & Volume of data in Manufacturing landscape

Compute, Transmission, Storage

~15 TB generated/day

These Use Cases will demand High bandwidth – Latency – Secure network for the M&M plant

ENTERPRISE DIGITIZATION SHIFT IN PARADIGM

CURRENT STATE

IT Digitalization Steadily Ongoing	IoT Investments OT Digitalization PoCs
Unused Data Data Silos Unanalysed Data	Legacy Applications Interoperability issues

CHALLENGES

Wireless Shift Speed, Reliability, Mobility, Security	Application Legacy to Transform
Cloud Shift Latency, Privacy & security concerns	Discrete Assets Heterogeneity
On-Prem Capex intensive	People Resistance to Change

SHIFT IN LANDSCAPE

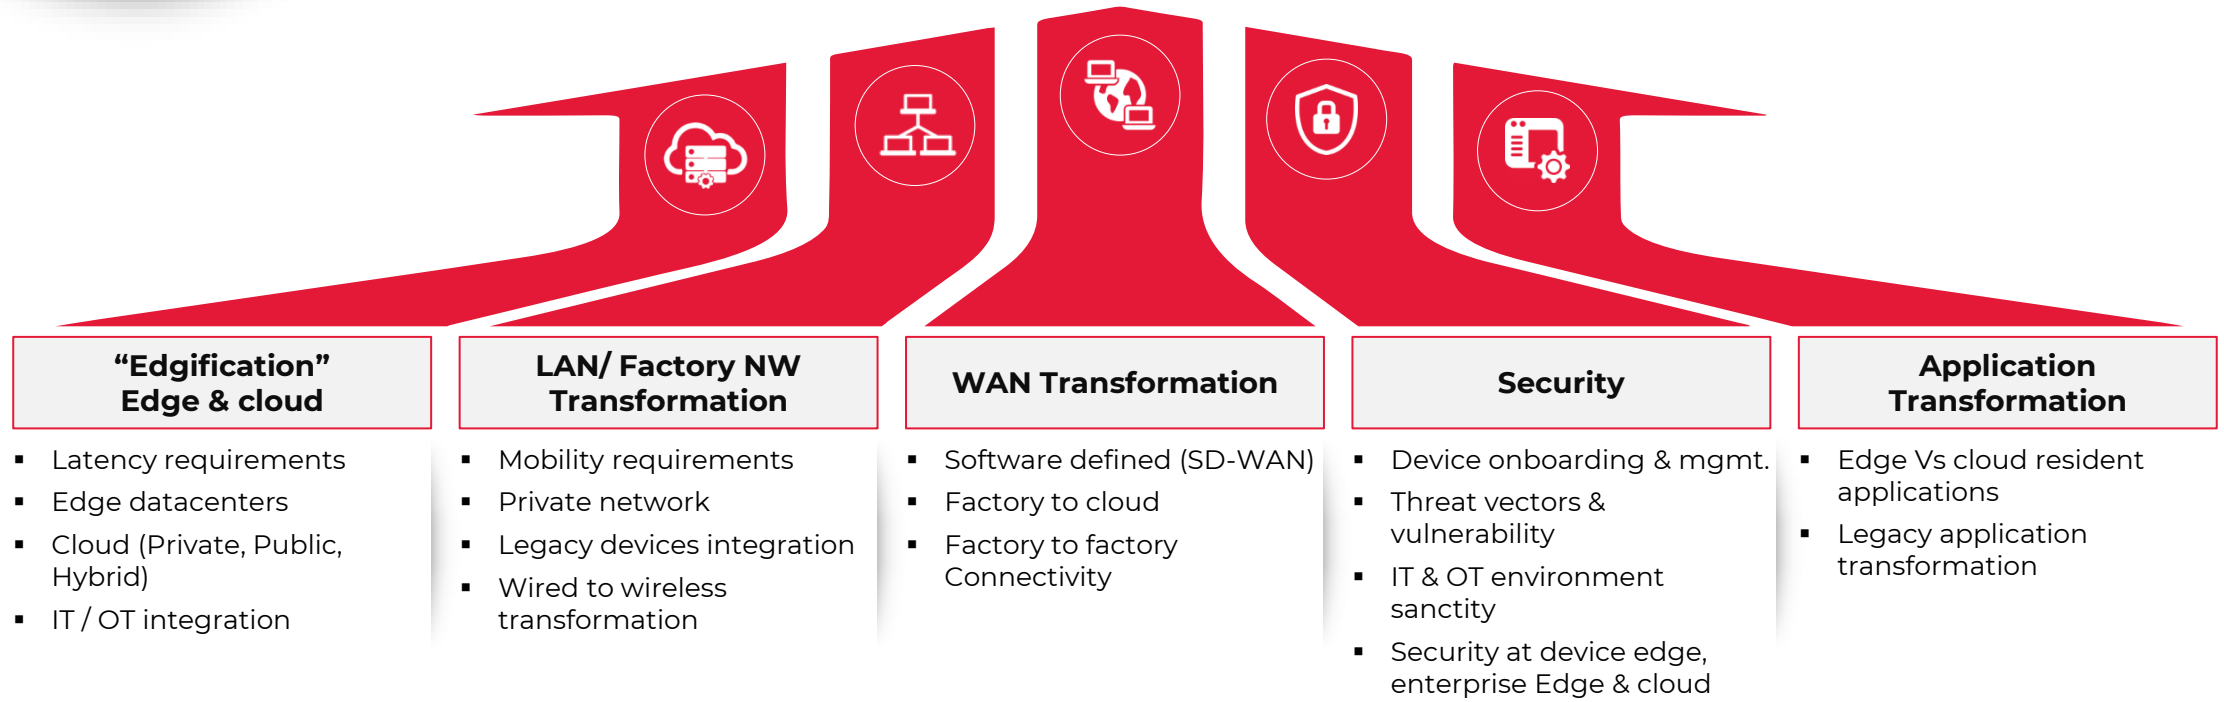

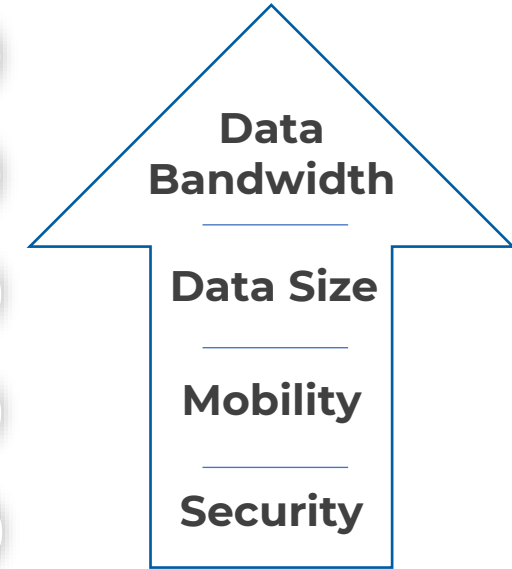

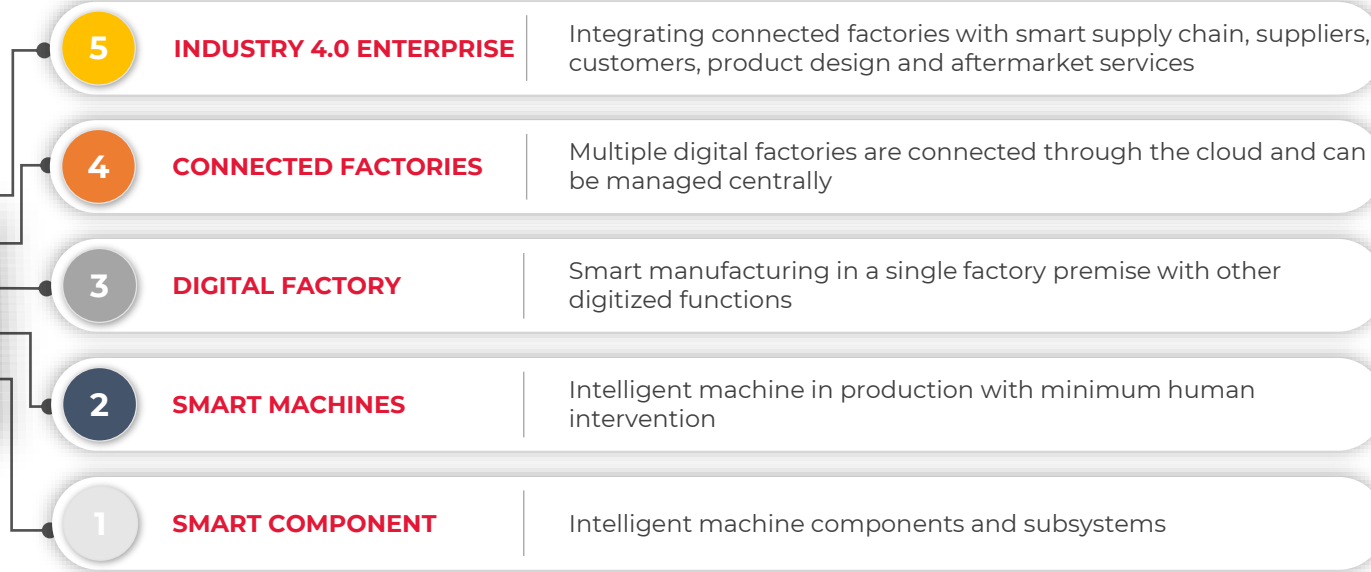

4.4 ZB
Machine Generated
Data by 2020

- Customer experience

5G FOR ENTERPRISE : SHIFT INTELLIGENCE TO THE EDGE

Data Processing function of Latency, Privacy, Cost

Latency 0 ms
Cost Optimization 0%
Privacy Vulnerability Low

20 ms
 20-30%
 Low - Medium

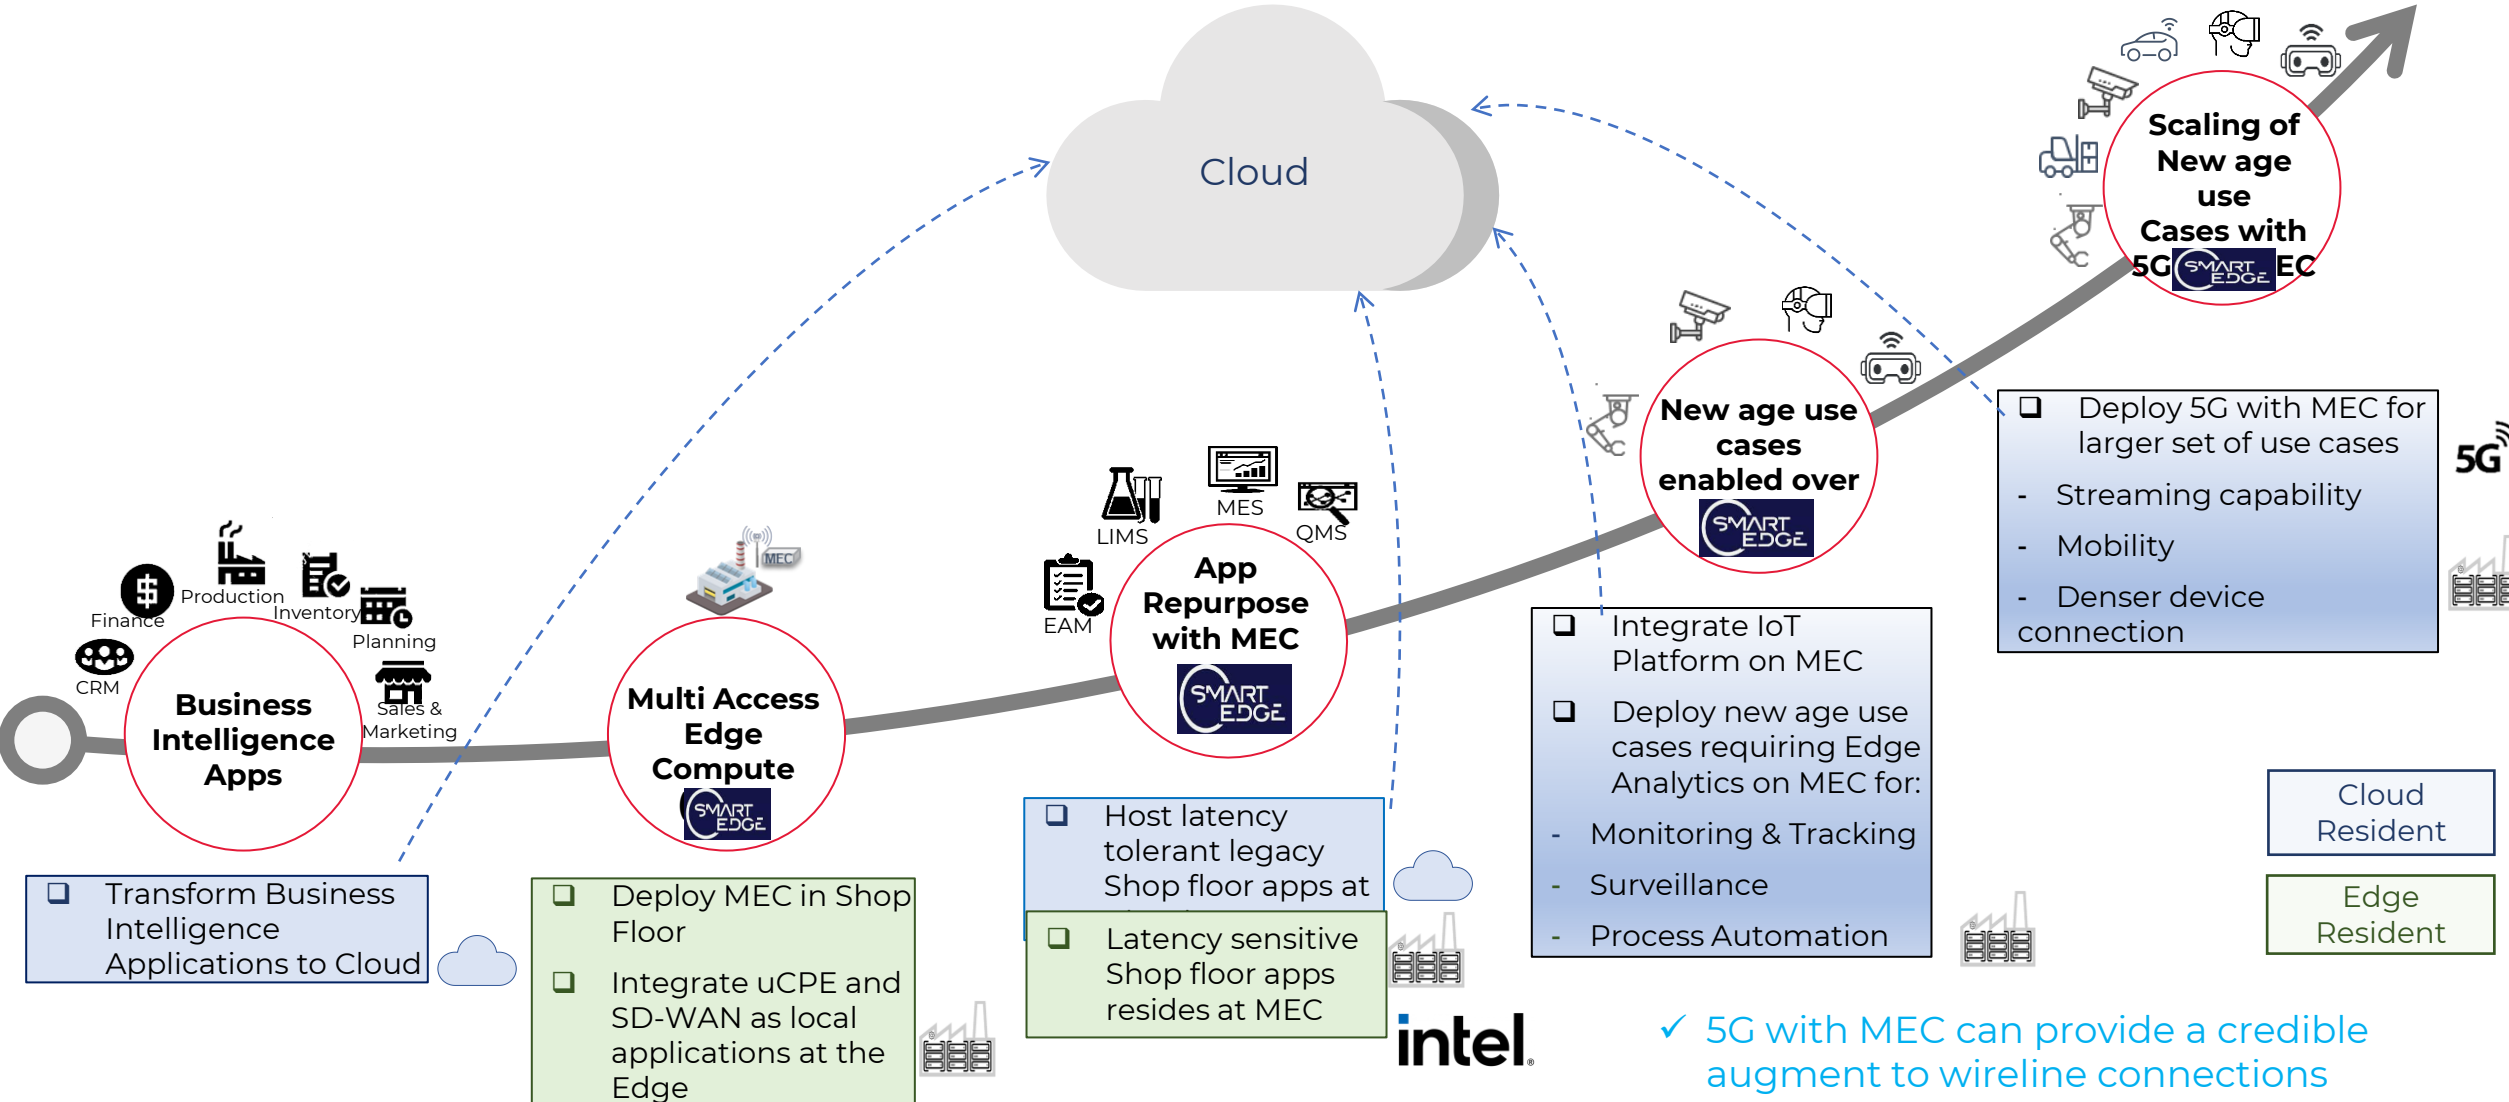

100ms
 55%
 High

SENSITIVITY

Action @ Edge	Latency	Privacy	Ephemeral
Pass through	No	No	No
Use & Pass	Yes	No	No
Use & Hold	***	Yes	***
Use & discard	***	***	Yes

ENTERPRISE DIGITALIZATION ROADMAP

5G & MEC enablers in the road map

- ✓ 5G with MEC can provide a credible augment to wireline connections
- ✓ LTE with MEC is starting point for many use cases

EDGE DIGITAL SOLUTION PACKS

Manufacturing Nxt
Building a wireless and secure Factory-of-the-Future

30% Drop in inspection time and error rates
10% Improvement in production efficiency

OnG Nxt
Digitally enabling NxtGen Connected Oil & Gas Industry

30% Downtime Reduction by reduced MTTR
25% Operational Efficiency improvement by increased MTBF

Healthcare Nxt
Redefining care in the era of 5G

25% Door to Needle
12% Mortality

EPCM Nxt
Connected Construction enabled by 5G

20% increase in throughput
10% Reduction in CAPEX

Port Nxt
Port Automation Solutions enabled by 5G

17% Reduction in loading time
10% Container dwell time (1 hour - 2 m\$)

Energy & Utility Nxt
Utility & Beyond: Connecting World with Intelligent Network

50% reduction in training time
20% inspection & maintenance cost

- **Connected Assets** - Real time Inferencing of data
- **Digital Safety** - Improved personnel safety w/enhanced emergency response
- **Connected O&G** - Digital transformation with connected production controlled via remote operation centers.
- **Digital Turnaround** - Pre-integrated digital solutions leading to a faster and cost-effective turnaround.

- **Connected EPCM** (build right first time)- Intelligent Design, Connected Procurement, Smart Construct, Connected Commissioning, Intelligent handover
- **Connected Assets** - Real time Inferencing of data
- **Digital Safety**

- **Connected Assets** - Real time Asset Mgmt, AR assisted remote maintenance
- **Digital Safety** - Improved personnel safety w/enhanced emergency response
- **Digital Generation** - Real time equipment analytics
- **Smart Grid**- Smart AMI, Smart T & D
- **Smart Energy** (retail) - Connected customer, Smart Home city, Renewables

- **Digital Supply Chain** - Smart logistics with AIV technology and real time asset tracking for reduced response time.
- **Digital Production & Operations** - Smart Manufacturing to engineer connected, intelligent, and secure factories of the future
- **Digital Services** - Insights to predict machine needs and remotely assisted maintenance activities.

- **Real Time Diagnosis** in Emergency Care
- **Real Time Remote Monitoring & Consultation**
- **Tele Surgery**
- **Hospital Asset Mgmt**

- **Automated Container Management** - Real time Container monitoring and automated inspection for secured effortless cargo movement.
- **Digital Operations** - Digitally connected, hyper-efficient and sustainable - 5G Smart Ports for seamless flow of shipments.
- **Digital Safety & Surveillance** - Anytime, anywhere visibility & secured port operations.

Technology & Architecture Behind 5G in Industrial / Enterprises

Udayan Mukherjee

INTEL Senior Fellow

Chief Wireless Architect, Network & Edge Group

INTEL CORPORATION

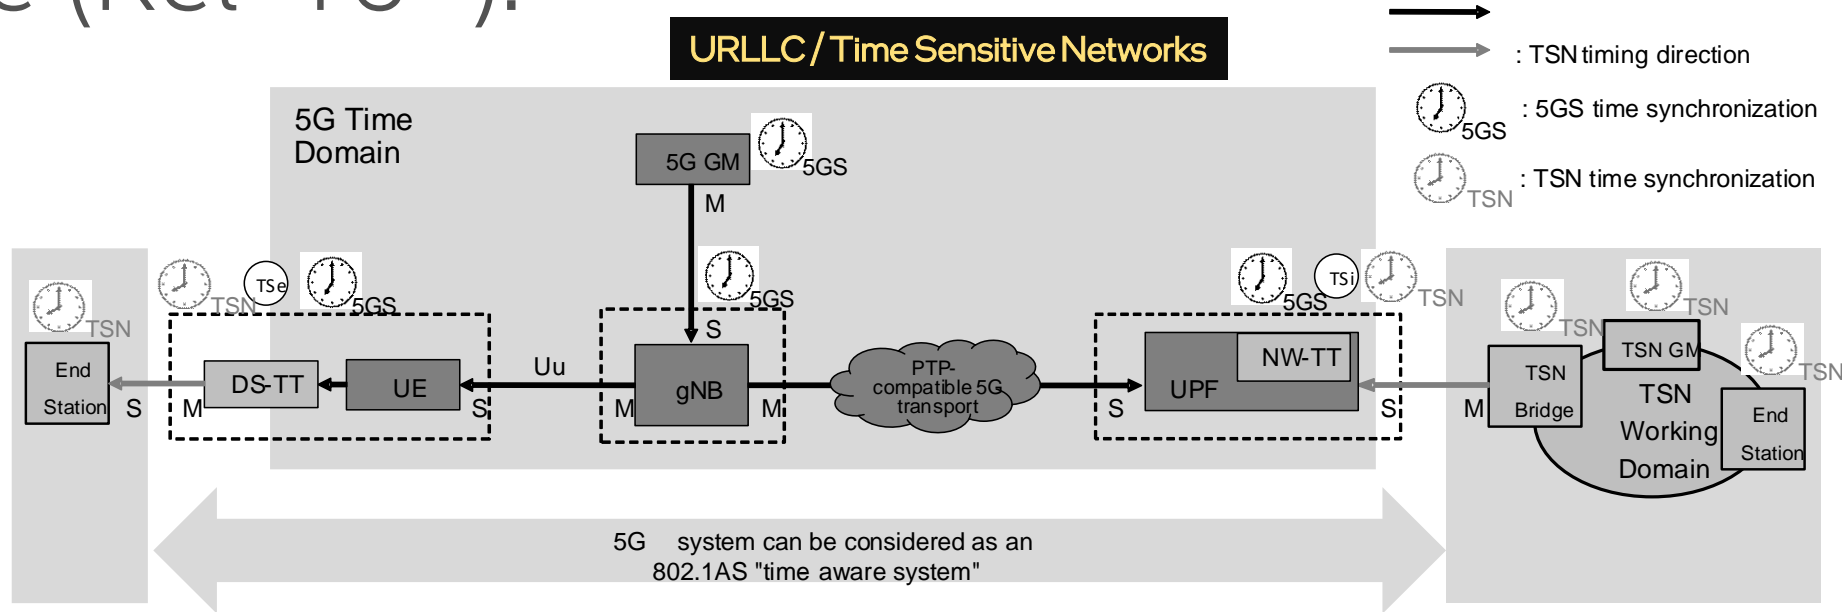

Notices & Disclaimers

- Intel technologies may require enabled hardware, software or service activation.
- No product or component can be absolutely secure.
- Your costs and results may vary.
- © Intel Corporation. Intel, the Intel logo, and other Intel marks are trademarks of Intel Corporation or its subsidiaries. Other names and brands may be claimed as the property of others.

Outline

- What is changing in Enterprise Networking?
- An example Reference Architecture
- Discussion on Use cases and deployment

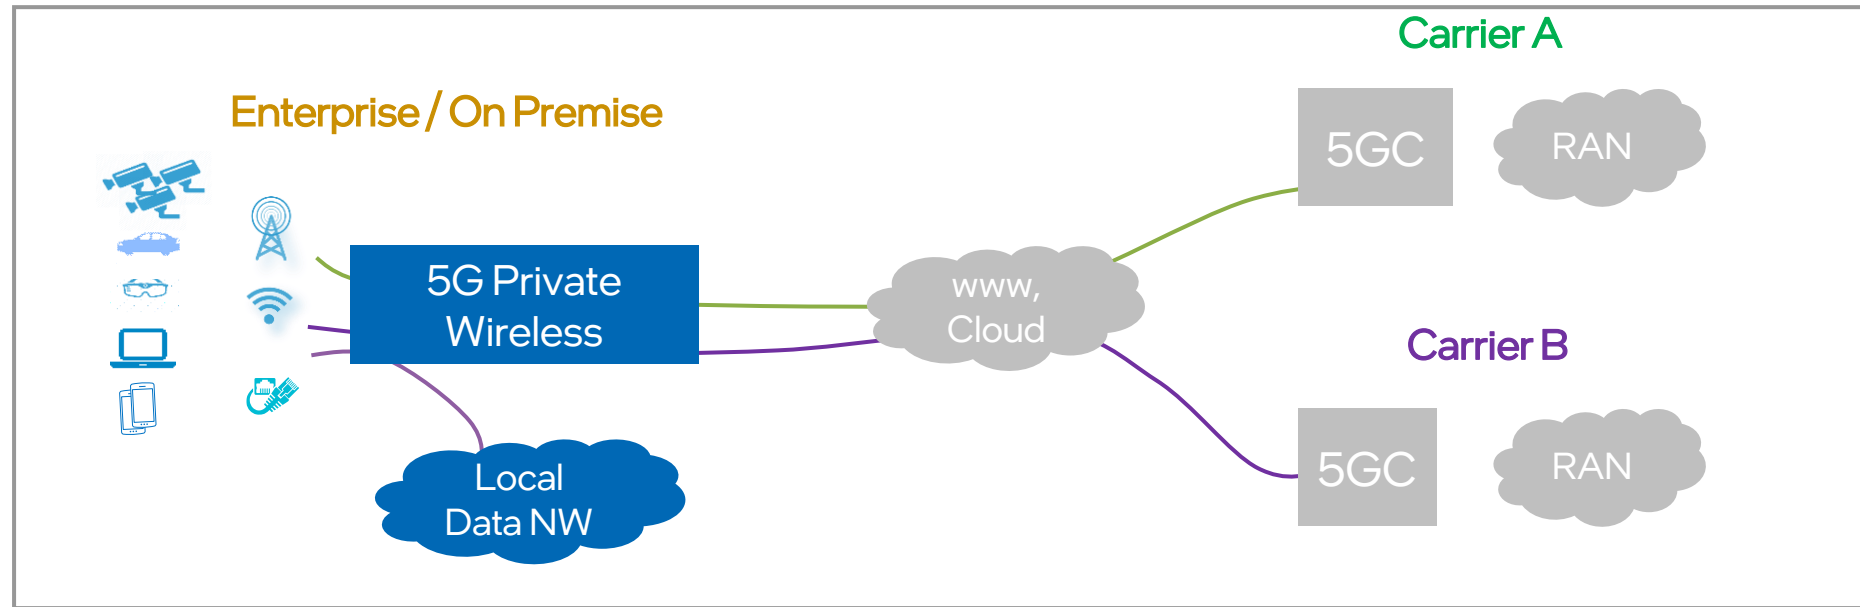

Beyond Mobile Broadband: Implications in RAN & Core (Rel-16+):

Platform for Low Latency & Reliability

- TSN / URLLC – implications to IO (QoS), TSN Translator for URLLC devices (*e.g. NIC enhancements for low latency traffic*)
- Stringent clock synchronization
- Accelerator offload overheads for low latency and jitter requirements
- Reliability KPI (Six 9s) using redundant paths, data duplication, multi-TRP connections, beamforming
- Optimization of transport for small packets

Enterprise Private Wireless Network

Digital Transformation in Enterprises

- Operational Efficiency & Automation (ex. AGV, Robots)
- Analytics & Insights (ex. Asset Tracking)
- Enhanced Collaboration & Productivity (ex. AR/VR)
- Security, Safety & Compliance (ex. Video Surv.)
- Experiences, Products, & Services (Context/Location)

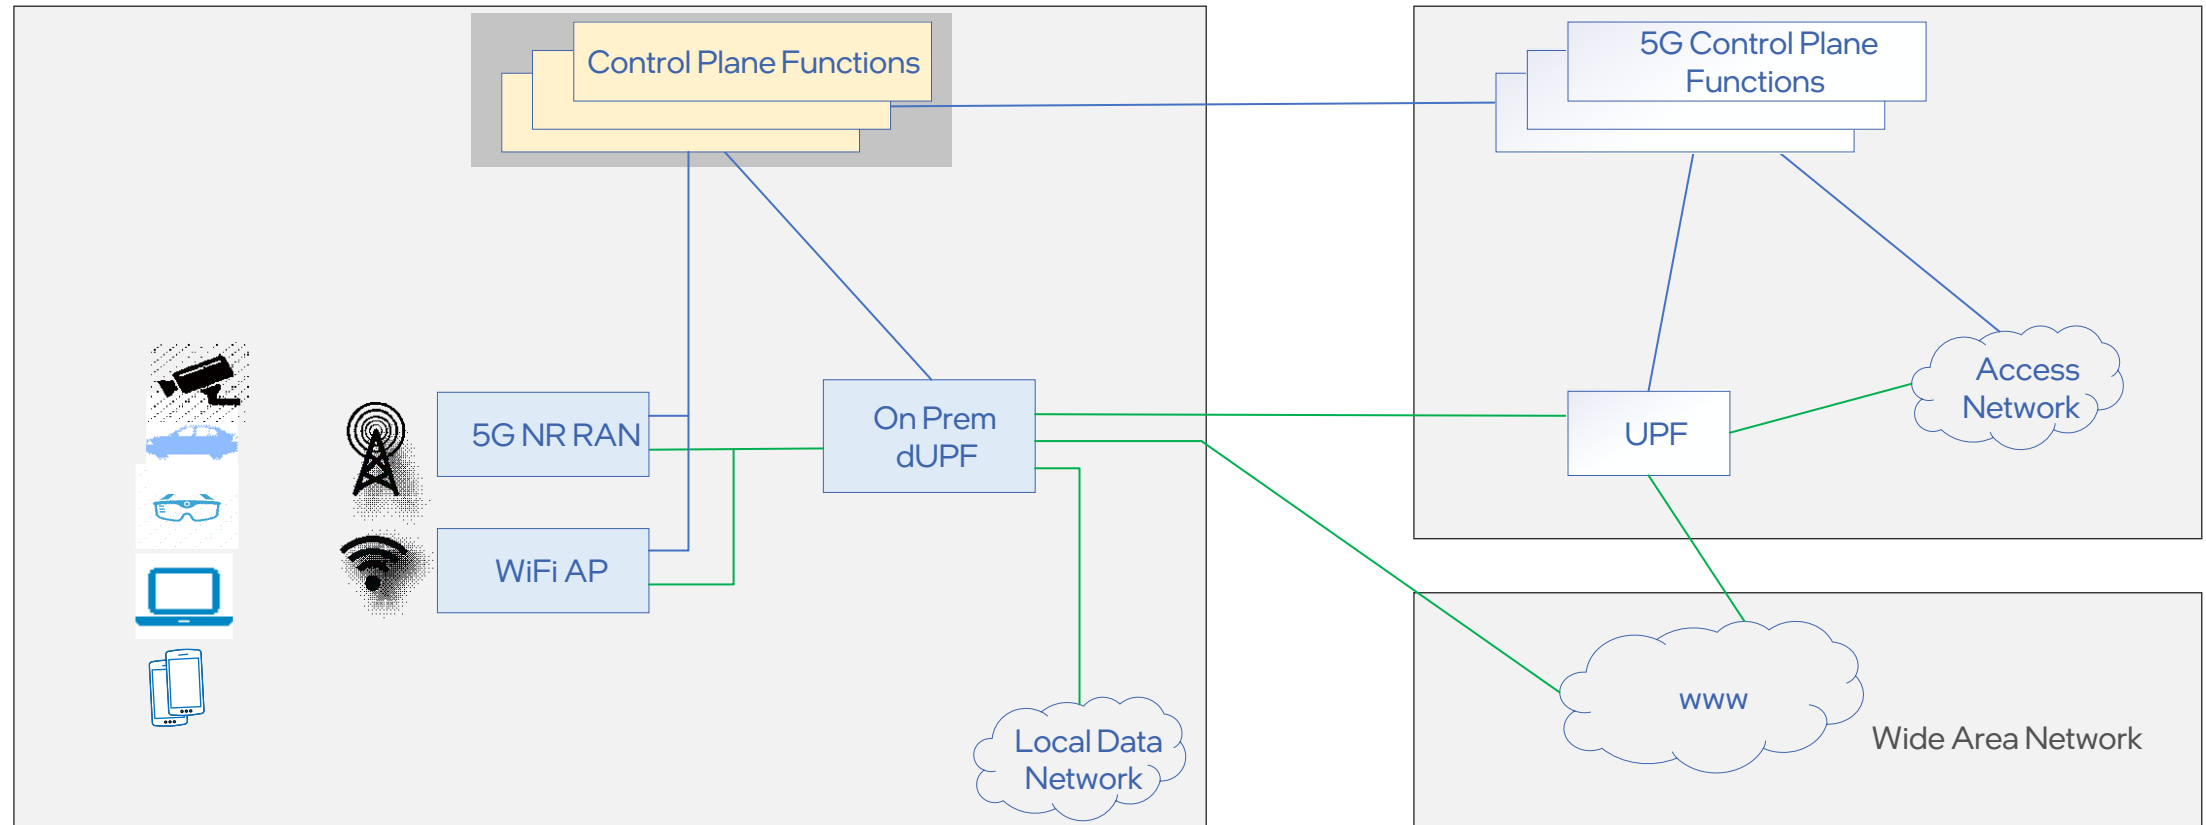

Enterprise Networks Evolving with Multi-Access Capabilities

- Increased **complexity** of managing **multiple networks** (e.g., Wired, WiFi, LTE/5G, etc.)
- **Coverage** and quality demands growing, including types of devices on network
- **New network capabilities** (i.e., TSN / URLLC)
- Improved **reliability** and **mobility**
- Growing impact of **security threats**
- Requirement for **data sovereignty** and control on-premises

5G Network for Private Enterprises

Enterprise domain (owned and/or managed)

Carrier Network(s)

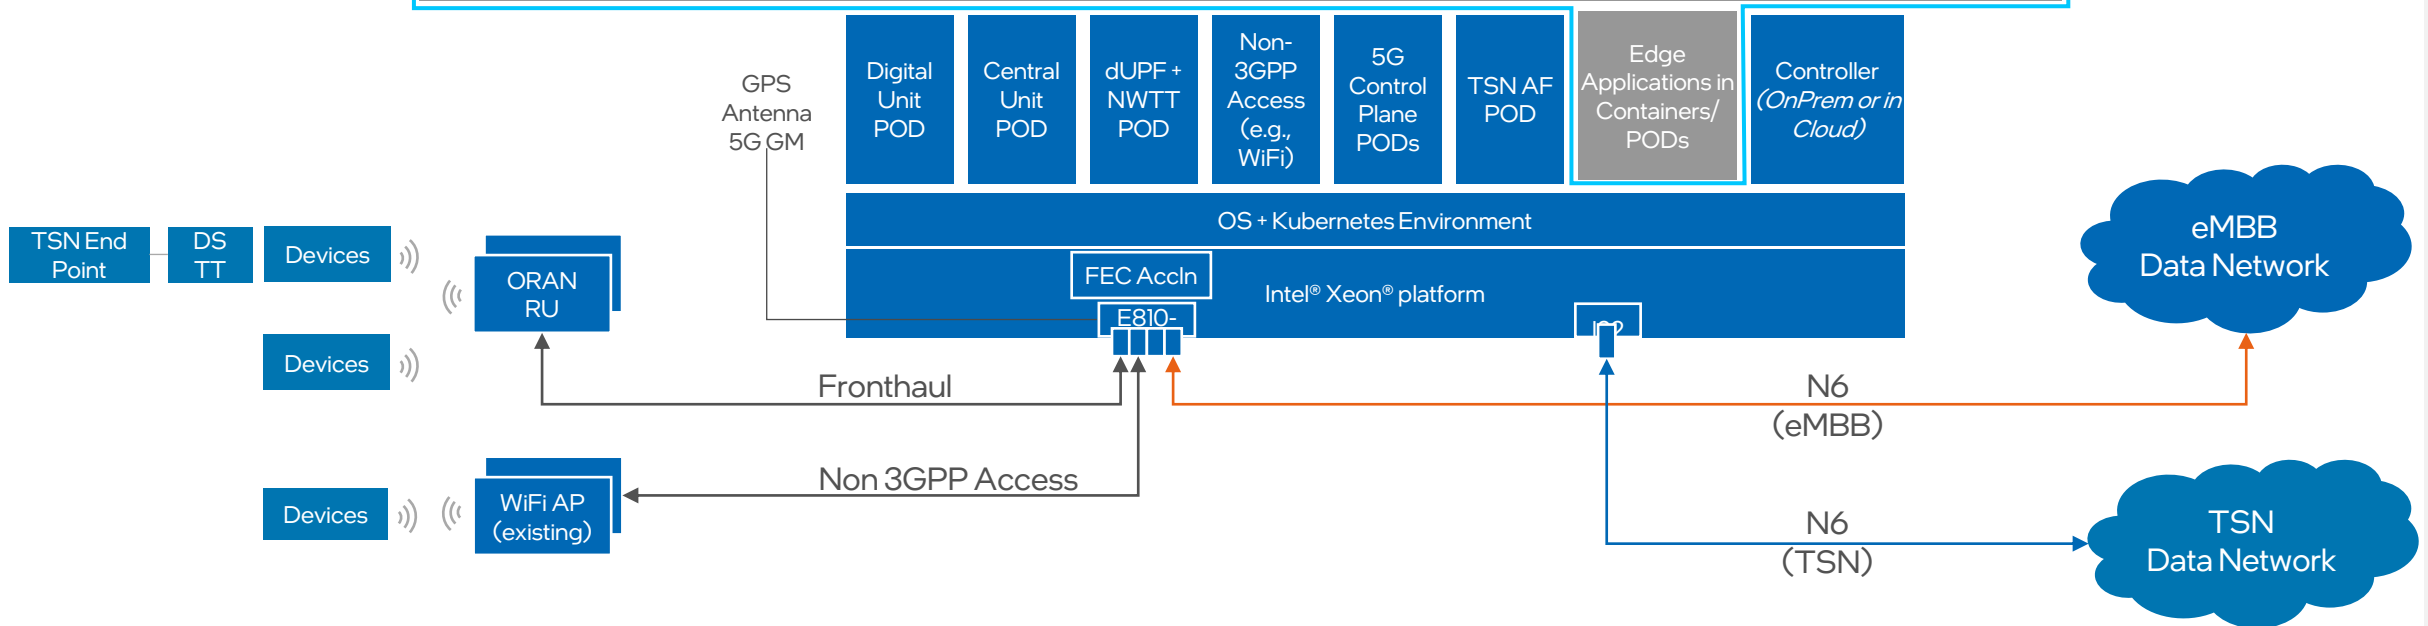

Control Plane Functions

- Deployed at Enterprise / Vertical Industry location, or in the Cloud (e.g., AMF, SMF, Application Functions for TSN, etc.)
- Built with Intel contributions in open-source community with Cloud Native capabilities such as Multus, Node Feature Discovery, Bond CNI, Telemetry aware scheduling, Topology Manager, CPU Manager, Intel® QuickAssist Technology Engine for OpenSSL*, etc.

5G Private Wireless Platform with Containerized NW Functions

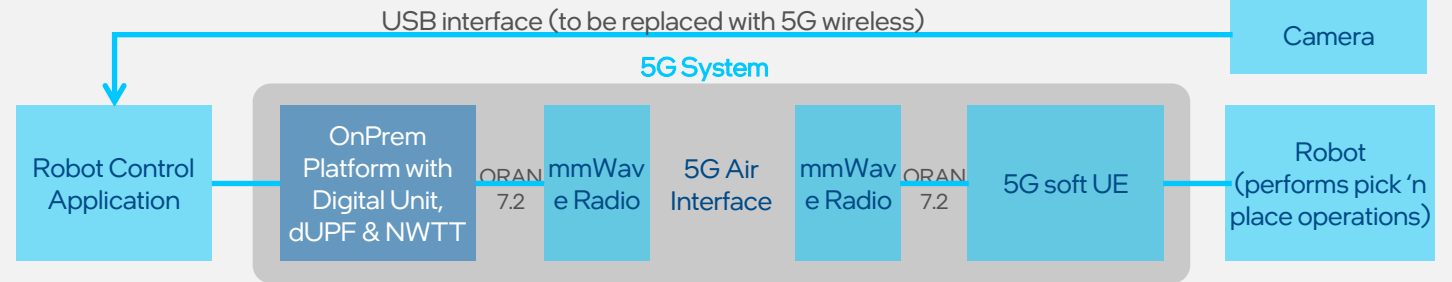

Example OnPrem Customer/Domain Specific Edge Applications Leveraging Open Interfaces

- AI/ML framework leveraging statistics/counters from DU, CU (e.g., PHY stats, IQ samples)
 - Applications managing AGVs, Robots, Location based Services in Retail, Positioning
 - CNC Applications interfacing with TSN-AF to configure & manage TSN end points

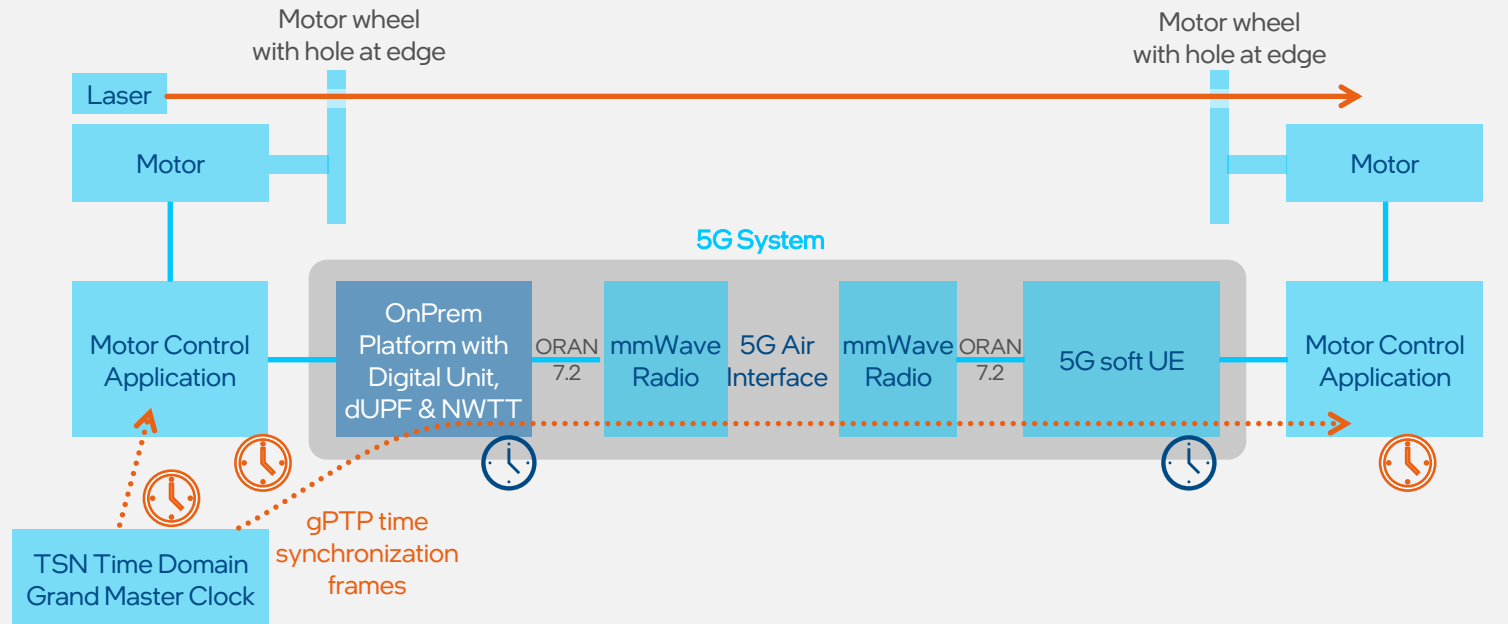

Demonstration of 5G in Industrial Application

Low Latency Characteristics of 5G

Time Synchronization Characteristics of 5G

Summary

- Enterprise Networks evolving with Multi-Access Capabilities with main focus on reliability, security and data sovereignty
- Intel as well as ecosystems are investing in 5G private wireless and deploying on-prem edge nodes at enterprise/vertical industry locations
- Industrial is one of the key initial vertical for 5G private network deployments
- Multiple real-life enterprise use cases are making the 5G private network a reality
