Private 5G | Igniting the Industrial Revolution

Caroline Chan

Vice President, Network and Edge Solutions Group

Intel Corporation

Network Transformation: Fundamental to 5G

Cloud to Edge-Native Transformation Brings

- Intelligence where it's needed
- Flexibility and agility
- Single, scalable architecture
- New use cases and services

Open Frameworks Bring

- Efforts led by key CoSPs & Cloud providers
- Reference implementations that accelerate development
- Ecosystem opportunities for verticals and private 5G

Open Consortia & Platform SW

Societal Shifts Will Drive Enterprises Toward an Edge-Native SW + AI Strategy

Labor Shortages and
Supply Chain Bottlenecks

Rapid Evolution of
Remote and Hybrid Work

Rising Privacy Concerns
& Patchwork Regulations

Digitization & Automation of
Physical Infrastructure with
Edge Native SW & AI

Distributed Access, Security
& Networking at the Edge For
Low Latency Worker Access

Cost effective, Privacy
Preserving Data Processing &
Storage at the Edge

Leading Industrial Use Cases

| Potential Use Case | Example Application | Comms & Compute Requirement | Edge to Cloud | |
|--|---|--|--|---|
|  | Guided and Autonomous Vehicles (AGV, AMR) | Material Handling in indoor and outdoor warehouses and factory floors, Collaborating Robots | <p>Comms: Mobility, Seamless handover, and Reliability</p> <p>Compute: Centralized control of AGV swarms, on-device sensor fusion, native 5G precise locationing</p> | <ul style="list-style-type: none"> • ERP/Warehouse mgmt. Integration • On-prem AGV fleet management |
|  | Visual Quality Inspection | Incoming, In-line, Outgoing inspection; ML based <i>Predictive</i> Quality Inspection to optimize production | <p>Comms: High and consistent data throughput</p> <p>Compute: Real time distributed inferencing, product and process data contextualization</p> | <ul style="list-style-type: none"> • ML Model training using data across global production lines |
|  | Augmented Reality (AR) | Connected Worker, Remote equipment & facility maintenance, Worker training | <p>Comms: High and consistent data throughput, Mobility, Reliability</p> <p>Compute: Rendition and augmentation at distributed edge</p> | <ul style="list-style-type: none"> • Equipment Supplier remote maintenance capability |
|  | Wireless Sensor Networks | Building automation and Remote operation command center applications | <p>Comms: Reliably support massive number of end devices/sensors</p> <p>Compute: Sensor Fusion, Aggregation, distributed analytics</p> | <ul style="list-style-type: none"> • Local versus facility wide operation decisions |

Use Case Example: Japan Waste Treatment Site

Smart Waste Management Factory Use Cases

- Remote control/driving of tractor/backhoe in the recycling plant
- AI Camera for safety protocol adherence monitoring (safety helmet detection, human detection during operations)
- Real-time digital twin of tractor/backhoe

Private Network

- Enables real-time low latency connectivity
- Real time decision making via data collection & analysis

Edge Compute

- Ability to stream real time videos from edge node leveraging 5G connectivity with large bandwidth and low latency

Use Case Example: Vision- Based Factory Workloads

Manufacturing Workload Optimization

- AMR fleet management
- Virtual PLC consolidation
- Asset health maintenance

Use Case Priority

- Worker Safety: Keep out zoning
- Vision-based workloads
- AMR utilization, status, and real-time location

Private Network

- Seamless AMR mobility in and out of factory site

Cloud Connectivity

- Edge to cloud function

Use Case Example: Aerospace Manufacturing

Existing Workstream Improvement:

- “Instant Work Area” creation
 - Floor changes daily
- Safety: Human and machine
 - Worker safety
 - Maintenance detection
 - AGV fleet management

New Workstream Enablement

- Mobile maintenance
 - Remote vendors
- Mass data consumption
 - 1TB per hour of data
 - 8 hours using traditional connectivity
- Inventory management/tool tracking
 - Vending machines vet credentials, location, time in/out

Private Network

- 300K square feet interior space

Thank You

The Intel logo is centered on a dark blue background. It features the word "intel" in a white, lowercase, sans-serif font. A small, bright blue square is positioned above the letter "i". To the right of the word "intel" is a registered trademark symbol (®). The background is a solid dark blue with several faint, semi-transparent squares of varying shades of blue scattered across it, creating a subtle geometric pattern.
