SOLUTION**

CONNECTING VIVERSE

ABOUT G REIGNS

HTC has 20+ years experience in the communication products from 2G, 3G, 4G to 5G. To enable 5G opportunity in enterprise segment, HTC has spined off the 20 years experienced 5G team to “**G Reigns**”, 100% HTC subsidiary.

G Reigns is a small but solid team with only 50 employees and 90% are engineers. It focuses in **5G** **O-RAN vRAN** software stack for private network. Its vision is to provide the optimized private 5G network service to help enterprise digital transformation.

BUSINESS PORTFOLIO

REIGN CORE SERIES

Standard Package (PoC or Buyout)

Plug & play simplicity in one mobile package. Keep versatility for expansion

Reign Core Series
(5G portable box)
5GC + BBU + RRU

✓ Reign Core

✓ Reign Core S2

VRAN SOFTWARE

Project Based End-to-end solution

Use case specific scaling with optimization on applications leveraging best of HTC VIVE such as XR on edge & AI
Choose from trusted COTS: Supermicro, QCT, Ufispac etc.
5GC tested: Ericsson, Nokia, Cisco, NEC, etc.

✓ High Coverage

✓ High Data Rate

G REIGNS @ SMART MANUFACTURING

Case 1

In the production line of the factory, in order to let material handling work more flexibly with AGVs, four RUs are deployed in a space with four compartments within 55m*70m, and the four AGVs can pass through the 5G network in the entire field. The network performs smooth handling tasks and monitoring, and immediately returns the results and provides warning messages without any waiting of re-registration during roaming.

Case 2

In the factory, in order to reduce industrial accidents and improve efficiency, a small-scale 5G network coverage is deployed in the automatic storage area of 10m*15m. There are three high-definition cameras provided for AI monitoring with Real-time feedback and AI discrimination results.
