

## Executive Biography

### Gibson Ang

**Gibson Ang** is a telecom innovation leader with extensive expertise in 5G, cloud-native solutions, product management, and system engineering. With a career spanning over two decades, Gibson has held pivotal roles, including Senior Vice President of Product Management and Solutions at Casa Systems, where he spearheaded the transition to cloud-native 5G core networks and secured significant wins with top global operators like Verizon and BT. He has a proven track record in driving growth, enhancing network efficiency, and leading cross-functional teams in delivering innovative solutions.

Gibson's earlier roles at Cisco, GENBAND, and Motorola further highlight his technical proficiency and leadership in the telecommunications industry. He holds a Master of Science in Communications and Signal Processing from Imperial College London and a Bachelor of Electrical Engineering with First Class Honors from Nanyang Technological University, Singapore. Gibson has been recognized with several awards, including the Cisco Distinguished Speaker award and has actively contributed to industry standards through organizations like 3GPP and BBF. Passionate about shaping the future of telecommunications, Gibson is driven by the potential of 5G and beyond, continually seeking to innovate and deliver value in a rapidly evolving market. Gibson leads the products on the Nybsys team.
