Maciek Konstantynowicz

FD.io CSIT Technical Project Lead, Distinguished Engineer

Cisco

Maciek Konstantynowicz is the Technical project lead of FD.io CSIT open-source benchmarking project from its inception. He focuses on developing Internet technologies and compute networking systems that enable deployments of connected distributed applications. Making the disaggregated systems work efficiently by developing and driving known and novel efficiency and performance-centric design engineering and benchmarking practices. Active in many technology areas including IP networking, cloud-networking, compute x86/Arm, accelerators, benchmarking, IETF, open-source.
