Executive biography

Andrew Lamkin

Health and Life Sciences Solutions Architect

Intel

Andrew Lamkin is a Health Security Architect at Intel Health & Life Sciences, where he applies his background in mission-critical computing from the defense and aerospace industries to build a foundation for trusted computing in healthcare.

At Intel, Andrew leads medical technology programs, applying his skills in complex system engineering, software development, and interest in successful technology transfer programs, to address security challenges in healthcare. Andrew holds patents in aerospace, defense, and healthcare.
