

Executive biography

**Adrian Boguszewski**

**AI Software Evangelist**

**INTEL**

AI Software Evangelist at Intel. Adrian graduated from the Gdansk University of Technology in the field of Computer Science 8 years ago. After that, he started his career in computer vision and deep learning. As a team leader of data scientists and Android developers for the previous two years, Adrian was responsible for an application to take a professional photo (for an ID card or passport) without leaving home.

He is a co-author of the LandCover.ai dataset, creator of the Debug Image Viewer Plugin, and a Deep Learning lecturer occasionally. His current role is to educate people about OpenVINO Toolkit. In his free time, he's a traveler. You can also talk with him about finance, especially investments.
