Executive biographies

Ezekiel Johnson

Sr. Solutions Architect & Head of Pre-Sales [NAM & EMEA]

Prophaze

With over a decade of experience in cybersecurity and cloud solutions, Ezekiel helps global enterprises design secure architectures, implement zero-trust strategies, and streamline DevSecOps practices across complex environments.

Praveen K S
Security Engineer

Prophaze

With extensive experience in application and API security, Praveen specializes in WAF logic, DDoS mitigation, and real-time threat detection. At Prophaze, he architects detection strategies that protect enterprise workloads, ensuring adaptive and scalable defenses across DevSecOps pipelines.

Agnidipta Sarkar
Chief Evangelist

## ColorTokens Inc.

With over three decades of experience in cybersecurity, Agnidipta champions the adoption of Zero Trust strategies that help CXOs and boards build digitally resilient enterprises. At ColorTokens, he leads the development and evangelism of Mission-critical Assurance using Zero-trust Enforcement (MAZE), enabling organizations to implement breach-ready defenses across IT, OT, and cloud environments. As a contributor to global ISO standards, he actively shapes best practices in information security, continuity, and risk management for the modern digital era.

Yiwen Li
Software Solution Architect

Intel

Yiwen Li has 15+ years of experience in cybersecurity. He obtained PhD in Computer Science from New York University. His research areas include Operating System Security, Network Security and Virtualization. At Intel, Yiwen focuses on designing and validating cutting-edge solutions for cloud and network security workloads, leveraging Intel software and hardware technologies to build optimized solutions for SASE, XDR, and NDR.
